Organization profile

Dokuz Eylül University (DEU) has a long history of being a centre of research and education, particularly in the Aegean region since its foundation in 1982. DEU benefits largely from its geographical position as being located in Izmir and being at the crossroads of Europe, Asia, Africa, and the Middle East.

It is one of the largest universities in Türkiye with more than 70,000 students from all over the country and 4,600 foreign students from 109 countries. DEU has 18 faculties, 7 graduate schools and 3 institutes, 1 state conservatory, 2 schools, 6 vocational schools, and 42 research centres. DEU offers 67 associate degrees, 126 undergraduate, 328 master's, and 153 doctoral programs.

DEU offers a lively scientific environment with 3,612 academic staff and a powerful research infrastructure. In 2021, the Council of Higher Education presented DEU with the "Research University" certificate. For this title, the university was evaluated for 32 distinct indicators categorized as "research capability," "research quality," and "interaction and collaboration." DEU is among the initial 20 governmental institutions to be registered in Türkiye. Over the past three years (2022-2024), DEU has participated in 20 EU-funded research projects as either a consortium partner or coordinator, focusing on both research and development as well as social issues. DEU possesses a substantial portfolio of scientific output and research teams across several disciplines.

What are the organization's main activities?

As part of Dokuz Eylül University (DEU), the Dokuz Eylül Technology Transfer Office (DETTO) was established in 2013 to support DEU students, researchers, and the business community throughout the "Idea to Market" process. By promoting innovation-driven activities at local, national, and international levels, DETTO strengthens partnerships between academia and industry.

To foster effective university-industry collaboration, DETTO plays a key role in generating and transforming knowledge and innovation into commercially viable technological products and services that benefit society. It also provides universities with access to essential resources and infrastructure in research and development (R&D), innovation, entrepreneurship, and commercialization.

Complementing these efforts, Dokuz Eylül University Technopark (DEPARK) significantly contributes to the entrepreneurship ecosystem. Currently, it hosts over 150 firms, including more than 50 incubation companies and eight specialized in biotechnology. DEPARK also houses BAMBU, an incubation and acceleration center that actively supports the broader entrepreneurial ecosystem by offering comprehensive services.

What profiles and age groups of learners are concerned by the organisation's work?

The organization's activities have an impact on society and it reaches out to people by educational activities (for undergraduate and graduate students) and lifelong learning training programmes for all. A Lifelong Learning Center (LLC) also has specialised education programmes for all. The university's target demographic comprises individuals aged 18 and older who seek education in relevant disciplines. As part of its social impact, DEU carries out several training, workshop and cooperation activities with and targeting various stakeholders from public institutions to NGOs, from local governments to professional organizations.
